SUMMARY

Data engineer and analyst with 4 years of experience in Python and SQL. Primarily focused on data pipelines and analytics. Some web development through building internal dashboards.

EXPERIENCE

Data Engineer - Woolworths Group

- Build and maintain ETL pipelines processing 500M+ rows daily using Python and Apache Airflow
- Developed supply chain analytics dashboards in Looker and Streamlit
- Manage data warehouse on BigQuery with dbt for transformations

Tech: Python, SQL, BigQuery, dbt, Airflow, GCP, Looker, Streamlit

Junior Data Analyst - Quantum

- Built customer segmentation models using Python (scikit-learn, pandas)
- Created automated reporting dashboards in Tableau
- Wrote SQL queries against Teradata and Snowflake data warehouses

Tech: Python, SQL, Tableau, Snowflake, Teradata, Excel

EDUCATION

Bachelor of Data Science - Macquarie University (2019)

SKILLS

Languages: Python, SQL

Tools: AWS, Docker, Kubernetes, Jenkins, Git, Jupyter, Databricks, Snowflake, BigQuery, Looker, Streamlit, Tableau, dbt

Frameworks: TensorFlow, PyTorch, Keras, Flask, Django, FastAPI, React, Vue.js

Concepts: Data Engineering, Data Analytics, Machine Learning, Cloud Computing, DevOps, Software Development
